

AL512 Microcomputer Relay Protection Tester

Overview

Microcomputer Three-Phase Analog and digital device for relay protection testing with high accuracy, supports various phase current and voltage channels. It can simulate various operating conditions of the power system, such as normal. Protection relay tester which offers all the characteristics and functions needed for protective relay testing, in a manual or automatic mode, designed for maximum efficiency, flexibility and simplicity, with the required accuracy and performance to test any kind and type of relays in all.

AL512 Microcomputer Relay Protection Tester

ULKE-S1200 Microcomputer Protection Relay Test Kit 6 Phase

Accurate and Reliable Testing: The ULKE-S1200 Microcomputer Protection Relay Test Kit offers high accuracy in measuring single-phase current (0.2% accuracy, 5mA) and frequency (0.001Hz) to

TEST-630 SIX PHASE MICROCOMPUTER PROTECTION RELAY TESTER

TEST-630 SIX PHASE MICROCOMPUTER PROTECTION RELAY TESTER TEST-630 protection relay tester is a relay test equipment which offers all the characteristics and functions needed for protective

Relay protection tester,Power detection technology

The microcomputer relay protection tester is an intelligent testing device that integrates microprocessor technology, advanced electronic measurement technology, and software algorithms.

Interpretation of the role of microcomputer relay protection tester in

The microcomputer relay protection tester can ensure that the relay protection device always maintains good functional performance and reliability. This is achieved through precise and

Relay protection tester

It can not only test various traditional relays and protection devices, but also test various modern microcomputer protection, especially for transformer differential

Three phase relay protection microcomputer test system

Test-330 three phase microcomputer protection relay test system is the highly efficient relay test equipment of GFUVE company. It is produced by referring to technical condition for "DL/T624-2010"

What is a microcomputer relay protection tester and its significance?

The microcomputer relay protection tester can manually or automatically test various types of voltage, current, frequency, power, impedance, harmonics, differential, synchronous relays, etc.

Three-phase microcomputer relay protection tester

Three-phase Microcomputer Relay Protection Tester, Find Complete Details about Three-phase Microcomputer Relay Protection Tester, Relay Protection Tester, Protection Relay

Huazheng HZJB-1200 six phase relay tester six phase

Huazheng Electric HZJB-1200 six phase protection relay tester in discount
Introduction: Relay protection microcomputer test device plays a key role in

Application Research of Microcomputer Relay Protection in Power

According to the requirements and characteristics of performance test in the process of research and development of relay protection device, a general automatic test system for relay protection device is

Relay protection tester, microcomputer relay protection

KDJB-1200Y Relay Protection Tester with GPS The KDJB-1200Y is a high-performance, six-phase relay protection tester engineered for comprehensive

LND-802 Microcomputer Relay Protection

It can test not only various traditional relays and protection devices, but also various modern microcomputer protections, especially for transformer differential

Protection Relay Tester

Smart Multi-phase Relay Protection Tester is a new generation of intelligent relay protection test equipment for Substation ABB, Siemens, SEL, Schneider, NR

LND-1200 Six Phase Relay Protection Tester

Microcomputer relay protection tester with a large screen LCD display and flexible and convenient rotating mouse controller. Stand-alone operation has a strong

6 Phase Microcomputer Testing and Commissioning Relay Protection

Our main products are Insulation Oil Tester, Cable Fault Locator, Power Quality Analyzer, High Voltage Generator, High Voltage Capacitor, Testing Transformer and so on.

6 Current Output Relay Protection Tester Six Phases Microcomputer

This tester with standard 6 phase voltage, 6 phase current output, voltage 125V/phase, current 30A/phase, 6 phases in parallel can up to 180A. Digital Signal Processor Microcomputer.

Microcomputer relay protection tester

By analyzing the test results, we can determine whether the relay protection device is working reliably and whether it can accurately "respond" at critical moments.

Jhs1200 Portable Six Phase Current Injection

Jhs1200 Portable Six Phase Current Injection Microcomputer Relay Protection Analyzer Tester, Find Details and Price about Relay Protection Tester Relay

Microcomputer relay protection calibrator,Power detection technology

A1: Microcomputer relay protection calibrator is widely used in various types of microcomputer based and digital relay protection devices, including current, voltage, power direction,

VLUUKE Protection Relay Test Kit Microcomputer Relay

The device is working, protection has not yet been applied to the device.

S1200 Six Phase Relay Protection Tester

Digital Signal Processor Microcomputer. Not only test the traditional relays and protectors, but also test the modern microcomputer relays, special for transformer differential protection and transfer

LND-802 Microcomputer Relay Protection Tester

1.Meet all test requirements on site.The instrument has standard four phase voltage and three-phase current output. It can test not only various traditional relays and

Microcomputer Relay Protection Tester

Product Description Relay protection testing device is an important testing tool for ensuring power system running safely and reliably. HDJB series

Microcomputer Three Phase Relay Protection Tester -

Microcomputer Three-Phase Analog and digital device for relay protection testing with high accuracy, supports various phase current and voltage channels.

Huatian

HT-702 Protection Relay Test Set Microcomputer relay protection tester is in reference to issued by the ministry of the type of microcomputer relay protection test device technical conditions (discussion

VLUUKE LND-802 Three-Phase Relay Protection Tester

VLUUKE LND-802 Microcomputer Relay Protection Tester offers high accuracy, IP67 protection, and 10W power for three-phase relay testing. Customize support., Alibaba

T1200 Six Phase Relay Protection Tester

Digital Signal Processor Microcomputer. Not only test the traditional relays and protectors, but also test the modern microcomputer relays, special for transformer differential protection and transfer
