

Calculation of unit price for optical cable laying construction

Overview

Cost ranges for laying fiber optic cable vary widely based on ground conditions, required trench depth, and whether the project is urban or rural. Typical total project ranges run from about \$8,000 on small, simple runs to over \$60,000 for longer, heavily regulated deployments. Single-mode fiber costs less per foot than multimode fiber, but it requires more. Understanding these elements is critical to developing a competitive strategy and estimating potential returns on investment.
