

# Can PoE be used with a switch

## Overview

---

PoE is a standardized technology that enables network equipment, such as switches, to provide power to connected devices, such as IP cameras or wireless access points, over the same cable used for data transmission. But is it possible to use the POE switch as a standard switch?

Of course, it is doable! But, depending on your device, you must choose the switch that best supports your desires. PoE does not reduce network speed, does not waste excessive power when proper cabling standards are.
