

Can the primary distribution box be placed further away

Overview

While there is no one-size-fits-all answer, general guidelines suggest that the distribution box should be placed between 5 to 10 feet away from the septic tank. This distance allows for proper gravity flow of effluent while minimizing the risk of backflow and ensuring even distribution across the. Choose the right box based on environment (indoor/outdoor), load capacity, and durability. A well-chosen and properly installed distribution box can prevent electrical hazards, reduce downtime, and ensure your electrical system operates smoothly for years to come.

Can the primary distribution box be placed further away
