

Classification Standards for the Use of Engineering Distribution Boxes

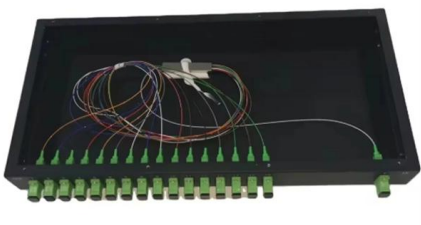

Overview

IP ratings focus on dust and water ingress, NEMA types cover broader environmental conditions, IK ratings measure impact resistance, and UL or CSA certifications address construction and safety compliance. Depending on country and industry, people are either familiar with the IEC system or not. ISO 18616-1:2016 specifies the four main types of reusable, rigid plastic distribution boxes for general purpose application in the fields of handling, transport, storage and display of products in distribution systems from the point of manufacture to the point of retail services: a) rigid.
