

Configure the fiber optic serial port of the switch

Overview

In this video, I'll break down 3 easy and practical ways to use fiber ports for high-speed connections: □ Method 1: SFP Copper Transceivers (RJ45 Media Converters) □ Method 2: Optical Modules + Fiber Patch Cables (LC-LC, Multimode/Singlemode) □ Method 3: Plug-and-Play. If you're looking to learn how to configure fiber optics on a Cisco switch, it's important to first configure the switch settings so it's ready for fiber optics. Each Fibre Channel port can be used as a downlink (connected to a server) or as an uplink (connected to the data center SAN network). Virtual Fibre Channel Interfaces Fibre Channel over Ethernet (FCoE) encapsulation. This appendix provides basic steps and commands to quickly configure a switch for fabric and possible FICON and cascaded FICON operation. Configure the application as follows: NOTE: Flow control is not supported on the serial connection when attached to a remote terminal.
