

Double-door high-voltage distribution box

Overview

This distribution box features a dual-door design, providing easy access to the internal components, such as circuit breakers, fuses, and wiring. A double door distribution board, also known as a double door consumer unit or distribution box, is an electrical enclosure used to house the electrical wiring and protective devices for a building's electrical system. Honeywell Sentry always put the customers first, we understand, for your multiple needs. Built from heavy-gauge stainless steel and designed with dual-door access, integrated grounding, and IP-rated sealing, it delivers long-term reliability in demanding environments.
