

# EPS distribution box automatic start

## Overview

---

Designed for use with AIO-H3/AC3 inverters, this compact and easy-to-install unit provides seamless automatic switching to off-grid mode during power outages. Configured with EPS BOX, customers just need to connect 6 wires between inverter and EPS BOX. This smart device instantly switches your critical loads to stored energy, transforming your photovoltaic installation into a truly reliable and autonomous. EPS BOX PRO is suitable for the residential power system and integrates Smart Meter, Breaker, ATS and other devices internally; It features convenient installation, and the power supply status of the load can be switched automatically or manually.
