

Ethiopia Data Center Cabling System

Overview

The facility enables simplified, fully routable interconnects across all cabinets using structured cabling for fibre and copper, including major cable systems like SMW-3, EIG, and SEA-ME-WE-5, ensuring high availability and flexibility. Raxio Ethiopia is the country's first carrier-neutral Tier III data centre facility, strategically located on the outskirts of Addis Ababa, to meet fast-growing demands for colocation in Ethiopia, home to some of East Africa's largest software companies and a dynamic SME ecosystem. Using CAT6/7 copper and OM3/4 fiber cables, our installations ensure high bandwidth, minimal interference, and scalability. What is Structured Cabling and Why It Matters?

Structured cabling is an organized, standards-based cabling system used to connect an. The additional space and equipment required to support data center operations — including power transformers, your uninterruptible power source (UPS), generators, computer room air conditioners (CRACs), remote transmission units (RTUs), chillers, air distribution systems, etc.

Ethiopia Data Center Cabling System
