

Fiber optic router signal blue light

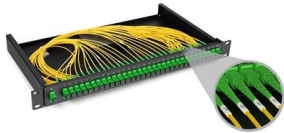

Overview

Off: The Wi-Fi feature is turned off or the router is not broadcasting a signal. Router status lights, often referred to as LED indicators, are small lights on the front panel of your router. Your modem's router light meanings comes down to three main factors: the light's color, whether it's blinking or solid, and the speed of the blinking. Each networking device manufacturer may use slightly different patterns, but most follow similar conventions that have become industry standards. Learn what each light on your fiber equipment means—from power and fiber signal to Ethernet and phone service—and how to quickly troubleshoot issues.
