

# How about fiber optic network cable panels

## Overview

---

A fiber patch panel organizes, protects, and simplifies the connectivity of optical fibers in your network. It provides a central point where incoming fiber cables can be connected to outgoing patch cords, making the network structured, accessible, and easy to maintain. Network architects and procurement managers must now evaluate patch panels not merely. Do you know which types are available?

What are their functions?

This article will show you.
