

# **How to configure the photo album module**

## Overview

---

Start: With the Drupal 8 Photo Album module, you create a page first that functions as a single album for a smaller subset of photos. It covers accessing the module, creating and configuring albums, adding individual photos, batch uploading via ZIP, managing categories, frontend display modes (thumbnail grid). The module automatically creates the photos content type which creates a node that contains all the photos (saved as managed files). How to Create an Image Gallery Using Views in Drupal 8?

This Tutorial will show how to create an Image Gallery with support for responsive thumbnails & mobile themes for Drupal 8 using Views, CCK Fields, and Colorbox JavaScript support. If this option is set to Yes, members will see a Photo Albums option in their Profile screen. Include the member's name in the photo album title - set this option to No if you want to.
