

How to set up wireless on a fiber optic cable

Overview

To set up your router for fiber internet quickly, connect the router to your fiber modem, access the router's settings via a web browser, and input the provided ISP credentials. Fiber transmits data using light signals through glass strands, delivering faster speeds and lower latency than cable or DSL connections that rely on. Fiber optic cables are capable of supporting data rates up to 10Gbps or even higher. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid.
