

# **How to wire the dimming power module**

## Overview

---

Use 16-20 gauge solid wire and connect neutral (white), voltage (red), DIM- (pink) and DIM+ (violet) wires to poke-in terminal block on module and route to fixture. LED dimmers have revolutionized the way we control lighting in various settings, from homes and offices to commercial and industrial spaces. They offer the flexibility to adjust the brightness level of LED lights, thereby enhancing the ambiance, improving energy efficiency, and even contributing to. PowPak® Dimming Module can be installed in a junction box or marshalling box using the conduit nut (provided) or with mounting screws (not provided).
