

Huawei Layer 3 Core Gigabit Switch

Overview

Built on Huawei's unified Versatile Routing Platform (VRP), CloudEngine S5731-S switches provide enhanced Layer 3 features, simplified Operations & Maintenance (O&M), Intelligent Stack (iStack) technology — allowing multiple stacking-capable switches to function as a single. They offer multiple models, such as those with twenty-four GE electrical ports, twenty-four GE optical/electrical hybrid ports, and forty-eight GE optical ports. Therefore, they can be widely used as core switches on a small campus network or. Huawei's comprehensive portfolio of products and solutions enables you to realize smooth digital transformation and rapid growth of virtualization, Big Data, and cloud services. Huawei switches already help customers achieve success in industries such as finance, Internet, retail, education. Within the fast-paced world of industrial networking, the S5735-L48P4X-A Huawei switch provides a "simplified" yet powerful architecture.
