

Huawei Tri-Network Universal Fiber Distribution Box

Overview

The Box FCDB-H216M1 is mainly used as CTO (optical terminal box) termination box for subscriber connections and distribution in FTTx networks and supports splicing and fiber division. Its design allows easy installation of the wiring as well as its reopening for maintenance. With Huawei's core concept for ODN construction centering on full and dense coverage coupled with short and easy access, Huawei's ODN 3. Fiber Splitter Distribution Box, also known as Fiber Distribution Box, provides fiber optic cable management for connection of distribution cables and drop cables via the PLC Splitter Insertion Module at the user access point in the FTTH passive optical network.

0 - Next-Generation Fiber Deployment with Hub & Sub Boxes As global demand for FTTH networks grows rapidly, operators face challenges of high deployment costs, long rollout time, and complex maintenance. Supplier highlights: This supplier mainly exports to Germany, Guatemala, and the United States and can offer minor customization. Delivery□ fast quality□ expected design□ expected service□ excelent Supplier's reply: Many thanks for you good comments.
