

# **Lighting distribution boxes can be classified according to their purpose**

## Overview

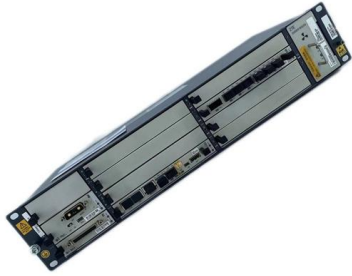

---

Common classifications include single-phase and three-phase distribution boxes, indoor and outdoor variants, and surface-mounted or flush-mounted types. This type of cabinet has a panel cover and is an openable design, providing protection only on the front. In this guide, we'll break down the 12 main types of distribution boxes in a way that's easy to understand. We'll chat about what each one does, where it shines, and then dive into how to choose the perfect box for your needs. A distribution box, also known as a power distribution box or electrical distribution box, is used to distribute electrical power safely to multiple circuits.

## Lighting distribution boxes can be classified according to their purp
