

Low-loss core switch inquiry

Low-loss core switch inquiry

A Compact and Low-Loss D-Band SPDT Switch Using 65-nm CMOS

A compact CMOS single-pole double-throw (SPDT) switch employing a parallel configuration of shunt transistors is proposed to achieve low insertion loss in the D-band.

Core loss measurement and comparative analysis for

Firstly, an automatic setup for core loss measurement of soft magnetic materials fed by a full-bridge inverter based on silicon carbide (SiC)

Uncoupled 4-core Fibre with Ultra-low Loss and Low Inter Core Crosstalk

In this report, low propagation loss and low XT of the uncoupled 4-core fibre with standard cladding diameter are realized, simultaneously. In order to realize low propagation loss and low XT, we

Design and Performance of 1×8 Core Selective Switch

The core selective switch (CSS) is an optical spatial switch that has been recently proposed as a key building block to achieve a scalable and low

Implementation of low loss Mn-Zn ferrite cores for power electronics

The eddy current loss of soft ferrite will take a major proportion of iron loss in these high-frequency switching power supplies. An attempt was made to develop low loss Mn-Zn polycrystalline ferrites by

Ultra-Wideband and Low-Loss Core Selective Switch Employing Two

Ultra-Wideband and Low-Loss Core Selective Switch Employing Two-Dimensionally Arranged MEMS Mirrors Masahiko Jinno, Itsuki Urashima, Tsubasa Ishikawa, and Takahiro Kodama

Iron Powder Cores for Switchmode Power Supply Inductors

Iron Powder as a Core Material: Iron powder is one of various core materials that are commonly used to produce magnetic components in today's switching power supplies. It is one of the least expensive

Core loss measurement and comparative analysis for

In this paper, an automatic measurement setup for the core loss measurement of three soft magnetic materials under complex non-sinusoidal

Multi-Level PWM core loss tester employing switch-mode power

A soft magnetic core loss tester originally designed for sinusoidal flux excitation has been modified to enable multi-level PWM excitation. The setup

Small-Size Low-Loss 28-GHz Body-Floated CMOS DPDT Switch

A small-size low-loss double-pole double-throw switch using a shared matching network (SMN) for two I/O ports is presented in which redundant matching networks of I/O ports are

Core Selective Switch With Low Insertion Loss Over Ultra-Wide

The core selective switch (CSS) is an optical spatial switch that has been recently proposed as a key building block to achieve a scalable and low-insertion-loss spatial cross-connects for use in future

Ultra-low-crosstalk silicon switches driven thermally and electrically

In this paper, we present two designs of silicon Mach-Zehnder Interferometer (MZI) switches achieving ultra-low-crosstalk, driven thermally and electrically.

MEMS mirror-based 1x4 Core Selective Switch for 12-core fiber with low

We demonstrate a novel MEMS mirror-based 1x4 core selective switch for 12-core multicore fiber. It achieves an insertion loss of less than 3.16 dB and negligible performance degradation on switching

Understanding Core Switch: What It Is and How to

In the realm of system networking, three key types of switches are frequently mentioned: access switches, aggregation switches, and core switches.

What is a Core Switch , Functions and Difference over Normal Switch

What is a core switch and how it works? This article builds the basics of this kind of switch for the ones who don't know anything about it. What is a Core Switch? It is a powerful

Design and Performance of 1×8 Core Selective Switch Supporting 15 Cores

A core-selective switch (CSS) is a key building block for a port modular spatial cross-connect where an optical signal launched into any core in the input multi-core fiber (MCF) can be

Core Selective Switch With Low Insertion Loss Over

The core selective switch (CSS) is an optical spatial switch that has been recently proposed as a key building block to achieve a scalable and low

Core Selective Switch with Low Insertion Loss Over Ultra-Wide

Abstract--The core selective switch (CSS) is an optical spatial switch that has been recently proposed as a key building block to achieve a scalable and low-insertion-loss spatial cross-connects

Next Generation Ultra Low Loss PCB Materials

This presentation details background information to assist with these discussions: Trace lengths from a 1RU 256 lane system Measured Losses from new ultra-low loss PCB materials The dB loss numbers

Low-loss silica waveguide 1×8 thermo-optic switch

Low-loss and compact optical switches are highly demanded in on-chip optical routing. A silica waveguide 1 × 8 thermo-optic switch based on cascaded 1 × 8 multimode interference (MMI)

A compact low loss high isolation DC-45GHz SPST switch in 0.13-um

A compact low loss high isolation wideband single-pole-single-throw (SPST) switch that operates from DC to 45 GHz is analyzed and implemented in 0.13-um CMOS process. Based on

Low Loss Optical Switch with Precisely Rotationally-Aligned Multi-Core

We propose a 1×4 optical switch with coupled-core multi-core fiber (MCF) array. An image processing allows MCF to be precisely rotationally-aligned. It enables the IL less than 0.6 dB with the uniformity

Large Core Ultra-Broadband/Low-Loss 1x1, 1x2, 1x3 Fiber Optical Switch

SKU: LCFF The LCFF Series fiber optic switch provides exceptional performance with ultra-broadband coverage from UV to IR, low optical loss, minimal temperature dependence, high on/off ratio,

A Compact and Low-Loss D-Band SPDT Switch Using 65-nm CMOS

Abstract: A compact CMOS single-pole double-throw (SPDT) switch employing a parallel configuration of shunt transistors is proposed to achieve low insertion loss in the D-band.

Core Network packet-loss

I get 1% packet loss and latency between 200-1000ms when pinging from the switch (cisco 2970) to any directly connected interface to a router (mainly 7206VXR) My concern is i have

A compact low loss high isolation DC-45GHz SPST switch in 0.13-um

A compact low loss high isolation wideband single-pole-single-throw (SPST) switch that operates from DC to 45 GHz is analyzed and implemented in 0.13-um CMOS process.

Low Loss Optical Switch with Precisely Rotationally-aligned Multi-core

We propose a 1×4 optical switch with coupled-core multi-core fiber (MCF) array. An image processing allows MCF to be precisely rotationally-aligned. It enables the IL less than 0.6 dB with the
