

Metal-free optical cable

Overview

The Optical fibers are housed in loose tubes that are made up of high-modulus plastic and filled with thixotropic jelly. The tubes (and fillers) are stranded around the central strength member to form a. Available in OM1, OM3 and OM4 multimode and OS2 singlemode, in 24, 36, 48, 72, 96 and 144 fibre counts. All feature a layer of glass yarns to provide reinforcement and additional fire protection, a water blocking tape. The stranded design (n x m) is available till 60 fibres, and with a multifunctional used reinforced glass roving braiding as a.
