

Optical Module 508

Overview

The OP508 was specifically designed as a cost effective solution for measuring, monitoring and logging insertion loss or power fluctuations. 25") portable module designed to minimize movement and bending of the reference and test cables. For more details, see data sheet For Illustration purposes only Our GUIDED WAVE™ 508 UV-VIS™ Full Spectrum Process Analyzer is a single or multi-channel, fiber optic, UV-VIS spectrometer system designed for use in process environments. An optical module is a typically hot-pluggable optical transceiver used in high-bandwidth data communications applications.
