

Outer diameter of single-mode 12-core optical cable

Overview

3 μm and a cladding diameter of 125 μm , the fibers conform to international standards, including G. This compliance ensures minimal signal attenuation and high performance in long-distance data transmission. Imm (main cord) Material Stainless Steel Color Silvery White UL94 V-0 (*Burning stops within 10 seconds on a vertical specimen, no drips of flaming particles. Specially designed compact structure is good at preventing loose tubes from shrinking. Steel wires ensure tensile strength, PE sheath protects cable from ultraviolet radiation. Small diameter, light weight and installation. Cladding is standardized at 125 μm across all fiber types to ensure connector and splicing compatibility. 12 Core FTTH Single Mode Optical Fiber Cable - Round OD 6 mm + FRP + Yarn Our 12 Core FTTH Single Mode Optical Fiber Cables are designed to meet the high demands of modern telecommunications networks.
