

# **Plugin for identifying cable trays**

## Overview

---

Select the feeding and fed panels, and let THBIM calculate and draw the shortest cable path through cable trays — instantly and accurately. Already have conduit paths in your model?

This tool lets you instantly convert them into electrical cables with proper routing — no redraw. The Atkore BIM Toolbar is a Revit® plugin that provides access to the BIM library of Atkore's full suite of electrical products, including strut, conduit, fittings, cable cleats, cable tray, bollards, and more. Along with this library of products, the toolbar incorporates a variety of features such. Users who are registered with EAE Electric can easily log into the plugin and start using it right away.
