

Production of electrical distribution boxes in the production workshop

Overview

Electrical control box production typically involves repeated sheet metal cutting, hole and opening processing, bending, fitting and assembly for compact box bodies, doors, covers, mounting plates and enclosure components. The box production process for electrical enclosures is a systematic workflow ensuring the manufacturing of high-quality electrical boxes, meter boxes, cabinets, and GGD enclosures. We're a professional manufacturer of low & high voltage electrical equipment, and this series focuses on the step-by-step production of distribution. Ever wonder how that metal box controlling your building's power actually gets made?

Distribution boxes – the unsung heroes tucked away in utility closets or basements – are more than just metal shells. Automatic Galvanized Steel & Stainless Steel Enclosure Box Production Line Projector Solution Product specifications: height adjustable 300-1200mm, depth adjustable.
