The KT-2 has two onboard relays. The two relays on the KT-2 board and any relays on optional extension boards that attach through RS-485 are defined as local relay outputs.

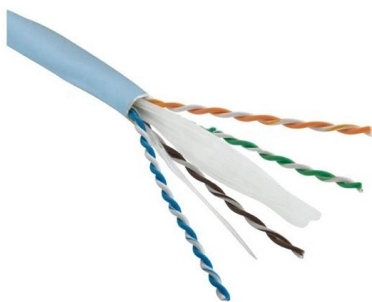

Multiplus-II K1, K2 relays

On the new Multiplus-II, the K1, K2 'relays' are described in the Appendix as "open collectors", which appear to be connected to a microprocessor directly. The Ground then appears,

Power System Protective Relays: Principles & Practices

Protective relays and devices have been developed over 100 years ago to provide "lastline" of defense for the electrical systems. They are intended to quickly identify a fault and isolate it so the balance of
