

Serbia Data Center

Overview

Request quotes for colocation, dedicated cabinets, cages, suites and bare metal servers. Serbia is emerging as one of the most structurally compelling data-center locations in wider Europe, not because it follows the traditional Western European hyperscale playbook, but because it sits at the intersection of three forces that now define digital-infrastructure investment: constrained EU. We currently have 12 data centers listed, from 4 markets in Serbia (Republic of Serbia). Save the trouble of contacting the providers yourself, check out our Quote Service. President of Serbia Aleksandar Vučić stated today that the State Data Center in Kragujevac has received a Tier 4 certificate, meaning the highest level of reliability and security, and emphasized that no country in the region has this level.
