

Swedish Railway Industry Switch Manufacturer

Overview

Vossloh Switch Systems (VSS) stands at the forefront of railway infrastructure, specializing in the design and manufacturing of high-performance switches and crossings. These are critical components that facilitate the safe and efficient movement of trains across various rail. High-speed switch installation on the Southern Main Line in Sweden In just one week of intensive work, Vossloh managed to deliver and install 16 advanced switches at four different locations on the Southern Main Line, the most critical part of Sweden's rail network between Malmö and Stockholm. To offer the right networking and communication solutions for rail operations, we offer a wide range of products, including wired and wireless devices, computing equipment and I/O controllers, from Hirschmann, Siemens, Red Lion Controls and Kunbus. Founded in 1909, the company has built a reputation for providing high-quality machinery, including a range of tampers and.
