Syrian-branded long-distance optical cable G 657A1

Overview

EasyBand® G657A1 bending insensitive single-mode fibre encompasses all the features of FullBand® fibre and provides good resistance to macro-bending. ITU-T (International Telecommunication Union) defines several single-mode fiber standards, including G. This method is in accordance with the rounding method of ASTM Practice E29 (Standard Practice for using significant diG657A1 is a single mode fiber type optimized for special application scenarios (higher fiber density cabling requirements), and belongs to the ITU-T G. In addition, these fiber optic cables are backward compatible with existing networks and offer improved bending performance. Totally Dielectric Optical Cable recommended for indoor building areas, especially on vertical backbones on Fiber To The Apartment (FTTA) systems for voice, data and image traffic.
