

Telecom router with 10Mbps fiber optic cable only has 2Mbps speed

✓ 100KWH/215KWH

✓ LIQUID/AIR COOLING

✓ IP54/IP55

✓ BATTERY 6000 CYCLES

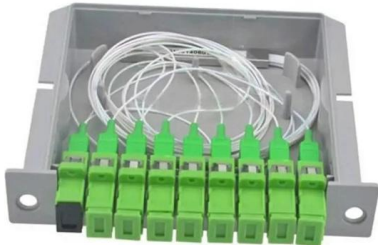

Overview

Make sure that you're using a Cat5e or Cat6 ethernet cable, otherwise that could be causing the lower speeds. First, unplug your router, and test the connection to the "LAN" port on the ONT using a computer. The cable transfer speed is limited to 10mbps, it's not a wiring problem because with another modem I don't have this problem. 2023-07-24 10:54:46 - last edited 2023-07-24 10:54:51 @terziyski The modem support 100Mbps -> $100/8 = 12.5$. go into device manager, go to network adapters, then find your ethernet driver/model name. The use of Wi-Fi 7 is one of the major reasons why this router gets the top spot.
