Tonga Gydt's Optical Cable

Overview

GYDTS optical cable features 4, 6, 8, or 12-core fiber ribbons placed within a loose tube made of high-modulus material, filled with thixotropic water-blocking gel for enhanced moisture resistance. GYDTS fiber optic cable is with corrugated steel tape armored and it is a ribbon type fiber cable which is suitable for installation in aerial or duct environment especially where high density fibers are expected. 3-2009 Optical fiber ribbon cable for access network Technical Parameters (Typical Value): Note 1. Utilizing a stranded loose tube ribbon configuration, these cables integrate multiple fiber ribbons inside durable PBT.
