

# Unit cost of newly built optical cables

## Overview

---

Factors like armor, jacket rating (LSZH), and raw material indices influence the final ex-factory price. The cost of setting up and operating an optical fiber cable manufacturing unit can vary significantly based on several factors. A complete fiber optic cable production line in 2025 requires an initial investment of \$750,000 to \$2,500,000. Fiber optic cables are high-tech communications cables that carry information like bursts of light along extremely thin glass or plastic strands, providing high-speed, high-bandwidth connectivity with little loss of signal. Here's a general pricing reference:

| Cable Type                    | Price Range (USD/meter) |
|-------------------------------|-------------------------|
| Simplex / Duplex Indoor Cable | \$0.                    |
