

Waterproofing the Bathroom Electrical Distribution Box

Overview

Use Waterproof Connectors: Standard wire connectors are not designed to prevent moisture from entering the junction box. These boxes typically feature a NEMA (National Electrical Manufacturers Association) rating that indicates their level of protection against environmental factors. For outdoor applications, look for junction boxes with a NEMA 3R or higher rating. These boxes are there to keep everything safe and working smoothly—no matter where you've got them installed. Also, regular maintenance and replacement of damaged equipment due to weather exposure can be costly.
