

# **Wiring of the fire protection module in the distribution box**

## Overview

---

This publication shows how to wire and install the 4010-9825 24V Distribution Block into a 4010 Fire Alarm Control Panel (FACP). The correct wiring method is crucial for ensuring the normal operation of the fire security system. When used in a Style 4 circuit, placing devices in several branches after 8709 modules, a short in the wiring. This guide aims to demystify these diagrams, offering a deep dive into their components, functionality, and practical applications. Install this product in accordance with NFPA 72, NFPA 70, and NEC 70 and all local codes.
